

Maastricht Aachen Airport

Maastricht Aachen Airport is a strategically located cargo hub in the heart of Europe, serving the Netherlands, Belgium and Germany as a gateway for efficient air cargo transport. Its proximity to major European economic centers and seamless multimodal connectivity makes it an ideal choice for airfreight operations. It is known for its efficient operations and accessibility.

Key advantages

Modern Cargo Infrastructure

- No slots restrictions
- Full 5th Air freedom
- Warehousing: On-site facilities include specialized storage for temperature sensitive goods, perishable items and high value cargo.
- Customs Clearance: On-site customs expedite clearance processes, reducing delivery times.

Strategic location

- Positioned in the Euregion, MST offers access to major economic centers in the Netherlands, Germany, Belgium and beyond.
- Within a 200 km radius, MST connects to over 70 million consumers.
- Close proximity to Rotterdam, Antwerp and Zeebrugge seaports facilitates smooth integration of air and sea freight.

24/7 Cargo Warehouse Operations

- MST operates around the clock, with no restrictions on night flights.
- Supports wide-body aircraft such as Boeing 747 and 777, ensuring flexibility for high-capacity shipments.

Multimodal connectivity

- Road: Direct access to key European highways (A2, A79) enables efficient last-mile delivery.
- Rail: Integrated rail links connect MST to Europe's extensive rail freight network.
- Sea: Proximity to Europe's largest seaports supports intermodal solutions.
